

TAYCAN^{AI}

AI Readiness Checklist

Is Your Business Ready to Deploy AI? Score Yourself Honestly.

Section 1 – Data & Systems

- We have data stored in accessible digital systems (not just paper or spreadsheets)
- Our key systems (CRM, ERP, helpdesk etc.) have APIs or export capabilities
- We can identify where our most important operational data lives
- Data is reasonably clean and consistent across systems

Section 2 – Workflows

- We can identify at least one workflow that is repetitive, predictable, and high-volume
- The workflow has clear inputs and outputs
- Someone on our team can describe every step of the workflow
- The workflow currently costs us meaningful time each week

Section 3 – People & Ownership

- There is a clear owner for the workflow we want to automate
- Leadership is aligned on AI being a priority
- We have someone who can dedicate 2-3 hours per week during the project
- We are open to changing how the workflow operates

Section 4 – Readiness

- We have budget allocated for an AI project this quarter
- We have a clear success metric in mind (time saved, cost reduced, etc)
- We are ready to measure results before and after deployment

Scoring:

- 13-15 checked: Ready to deploy now. Book a strategy call to identify your first workflow
- 9-12 checked: Ready with some preparation. We can help you fill the gaps quickly.
- Below 9: Book a strategy call first. We will build a readiness plan together.
